

In today's , World Social Media is the very common source to make money By different way

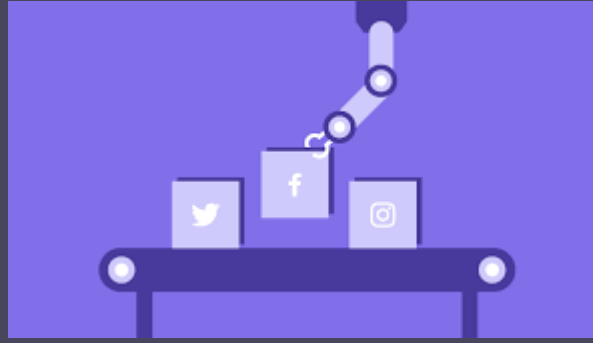

People who want to make money from social media

They have to analysis there progress

To Analysis there profile they have to check again and again there profiles And to take care about There competitors they also want to stock them again and by searching there profiles

So to do there all thing repetitively...it is consume very much time of a influencers on that time they can create more content for everyone
So to save the time of a content creators

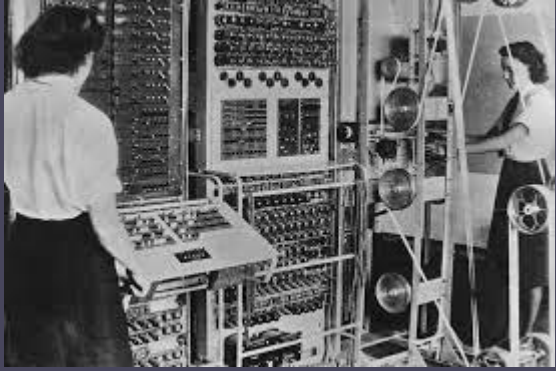

we can take some steps by technology we can automate there profiles By the help of coding

We chose a most widely used social media platform to automate known as **Instagram**

Future Scope

Like when the machine was introduced it brought with it a new era and is currently being developing in present.

when we humans started automating these machines, then the machines prove to be very advanced and profitable.

Similarly when the Social Media was introduced it brought with it a new era and is currently being developing in present .

when we humans started automating these Social Media platforms , then this is also prove to be very advanced and profitable.

Economically Profitable

Content creator

Business

Coders

When we start using automation that it is understood content is increases and content creator is also increases

Advertisement

because of this the employment is also increases for the coder because there work is to be increases in industry for automation also
